Grafische Unterscheidung zwischen PROD und TEST

For internal use only

1 Initial Situation/Problems

1.1 Situation/Problem

Some users at Siemens BT are working on different sites at the same time (e.g. on PROD and TEST). OOTB the connected site is shown in the header, but this is not very showy and well visible:

My Teamcenter (testuser1 (testuser1) - 110_MDesign_A / Designer - [Central-Site Productive Database] [] [] [] [])

1.2 Goals

Working out a solution to graphically differentiate the client based on the connected site.

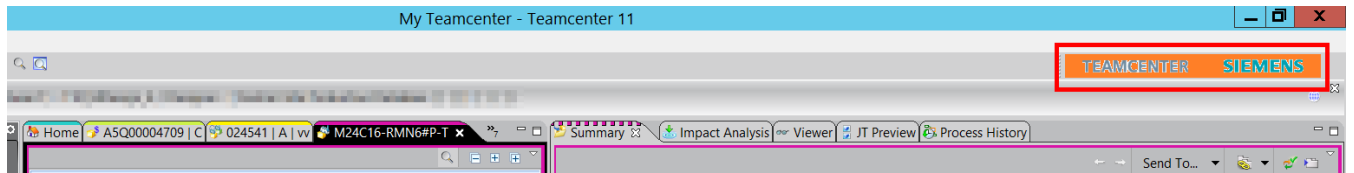

Grafische Unterscheidung zwischen PROD und TEST

For internal use only

2 Solution

2.1 Idea

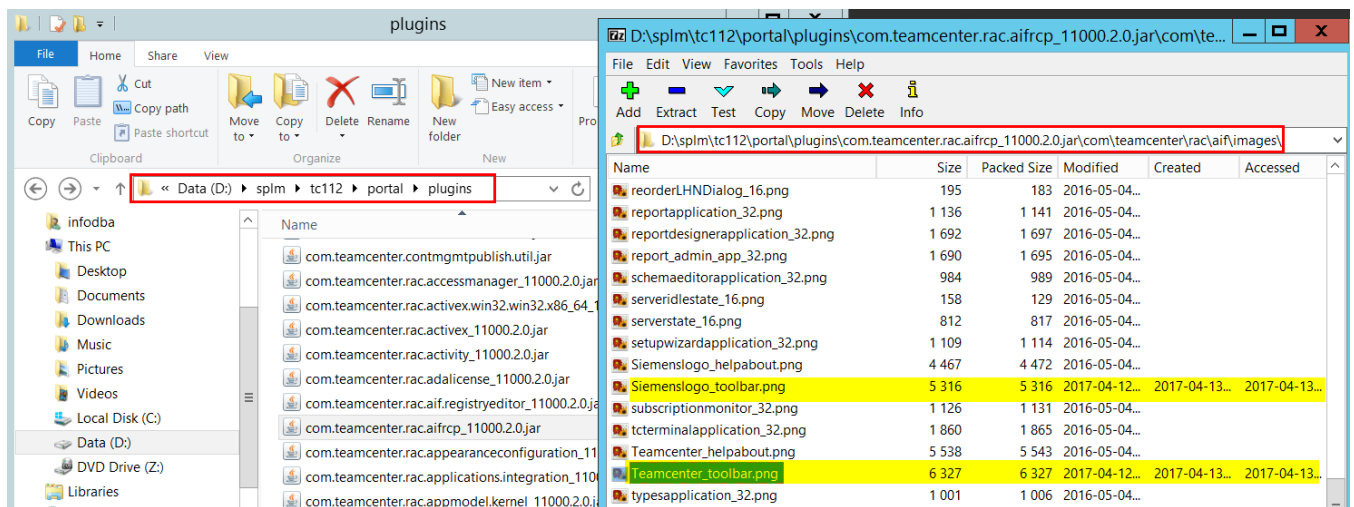

Change some images/icons of the TC client:

2.2 Implementation

2.2.1 Overview

Change the logos/images in the following direction:

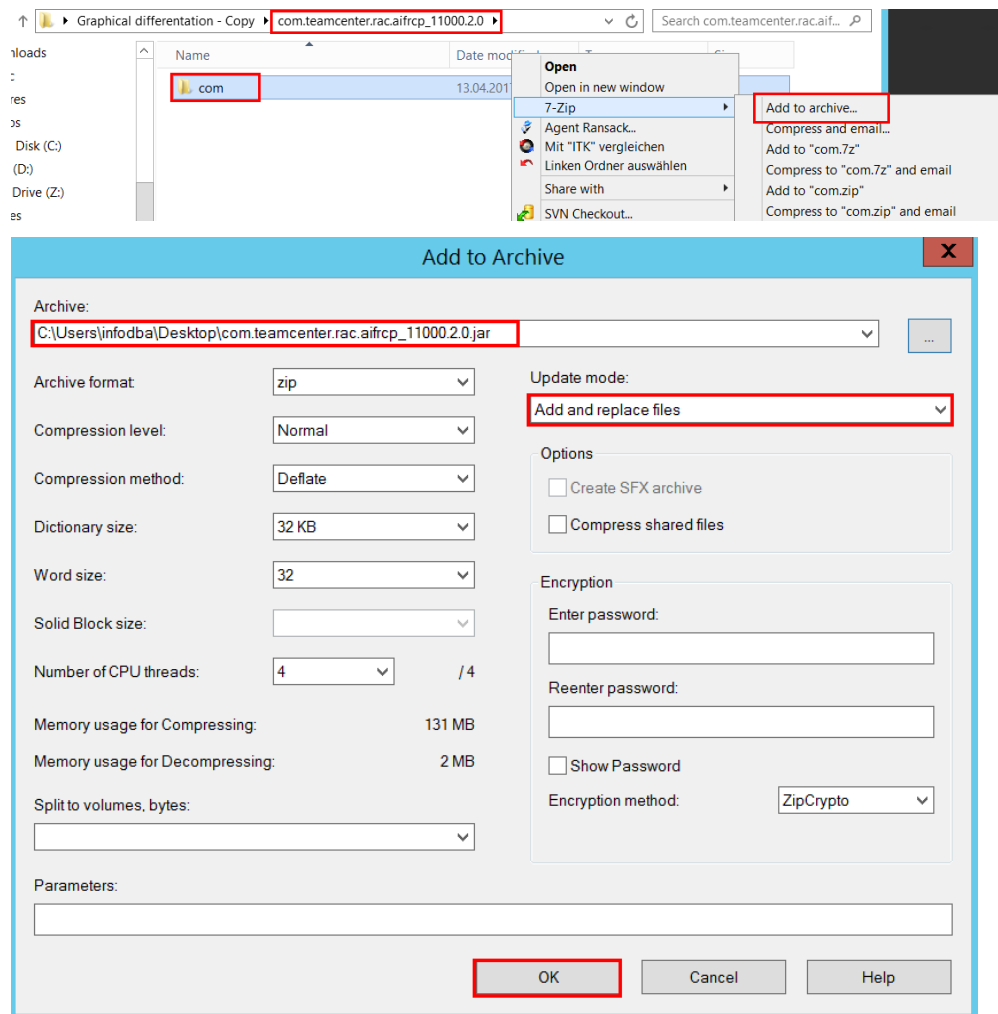

2.2.2 Detailed description

1. Extract the .jar file (com.teamcenter.rac.aifrcp_11000.2.0.jar)
2. Change the images you would like to change in the extracted folder (example: Siemenslogo_toolbar and Teamcenter_toolbar)
3. Delete all not needed folders in the extracted folder. After that there should be just the folder structure where the images are located

Grafische Unterscheidung zwischen PROD und TEST

For internal use only

4. Add the "com" folder to the originally .jar file (com.teamcenter.rac.aifrcp_11000.2.0.jar)

5. Replace the original .jar file with the newly updated
